

Frontiers in Classical and Quantum Initial Value Problems

CQIVP 2026

November 19-21 2026, Korea University, Seoul, South Korea

Invited Speakers - Research Frontiers

Mimetic Discretization

David Del Rey Fernandez (U. of Waterloo, Canada)

Wave propagation

Daniel Appelö (Virginia Tech, USA)

Numerical Relativity

Koutarou Kyutoku (Chiba U., Japan)

Non-linear SBP

Jan Nordström (U. of Linköping, Sweden & U. of Johannesburg)

Action Approach to IVPs

Will Horowitz (U. of Cape Town, South Africa)

Quantum real-time dynamics

Kirill Boguslavski (U. of Nantes, France)

Lattice Field Theory

Patrick Fritzsche (Trinity College Dublin, Ireland)

Quantum Computing

Dorota Grabowska (U. of Washington, USA)

Stochastic PDEs

Rongchan Zhu (Beijing Institute of Technology, PRC)

Stochastic Hydrodynamics

Marlene Nahrgang (SUBATECH, France)

Organizer: Alexander Rothkopf (Korea U.) – **Program Advisors:** Jan Nordström, Will Horowitz

4단계 BK21 물리학교육연구단
BK21 FOUR R&E Center for Physics

한국연구재단
National Research Foundation of Korea

Registration and abstract submission: <https://moim.korea.ac.kr/event/31/>
